

Swamp's Diesel 7.3L fuel injector warranty

Swamp's Diesel is pleased to announce that we are increasing our injector warranty on ALL of our 7.3L fuel injectors, from 2 year (unlimited mileage) to **200,000 miles**, or 5 years (whichever comes first).

The warranty will begin on the date that the product is delivered to the installer or retail customer.

Our warranty will cover any injector defect caused by our parts (including injector o-rings), our machining procedures, our assembly and/or testing process, and/or modifications we make to the fuel injector.

Swamp's Diesel will also cover labor & installation costs for customers that are able to bring the truck to our facility in LaVergne, TN, as long as it is a warrantable defect.

Exclusions to this warranty include:

Swamp's Diesel cannot cover injector damage caused by the following:

Injector damages caused by a lack of lubricity in the fuel:

- water in fuel
- gasoline in fuel
- poor filtration
- low fuel pressure
- 'home made' bio &/or veggie fuels

Injector damages caused by electrical, wiring, or engine problems (i.e., external damage to the injector itself).

Swamp's Diesel will not be able to cover/reimburse any losses related to labor, loss of time or wages, rental fees, towing fees, or damages directly or indirectly related to the use of our product. If the labor (diagnostics & installation) can be performed by one of our authorized dealers; please have our dealer contact us prior to beginning any work.

If internal injector damage (caused by fuel contamination, etc, as listed above) occurs within our warranty period, we will replace the damaged part(s) at a cost of \$60 per injector.

In order to be eligible for our warranty, you must send in your completed warranty card, providing us with the last 8 digits of the vehicle VIN, as well as the vehicle mileage at the time of the injector installation. This card is to be returned to us within 30 days of receiving your injectors.

Shipping procedure:

Swamp's Diesel will cover the (US FedEx Ground or US FedEx home delivery) shipping costs associated with shipping a (warrantable) replacement to the customer within the first 2 years. Expedited (overnight, 2nd day, 3rd day Express Saver) shipping costs will not be covered by our warranty. After 2 years, the customer is responsible for any shipping costs associated with having a replacement shipped. Return shipping costs of the original/warrantable injector to Swamp's Diesel, is the responsibility of the customer, in or out of our warranty period. If no core is returned, within 30 days of receiving a replacement, then the customer agrees to be billed \$125 per injector.

Our commitment to our customers:

Swamp's Diesel is committed to providing our customers with the most reliable, best performing, and most durable injectors available. Our commitment to providing quality parts, diagnostic support, and customer service to our customers is paramount.

Swamp's Diesel injectors are 100% rebuilt, in house, with the highest quality parts available, the most experienced staff, and a rigorous testing procedure to ensure that you receive an injector that is truly, *better than new*.

Our rebuilt injectors are guaranteed to have tolerances that are 'tighter' than new. We do not simply install new parts and ship them...we measure, disassemble, machine, clean, re-measure, reassemble and test every individual injector to ensure that it will last at least 200,000 miles. Every injector we build is subjected to (a minimum of) 3,000 injector firings on our injector flow bench. This *unparalleled* level of testing ensures that the injector is not only functioning properly, but also ensures that the injector matches the other injectors within its' set with less than a 1% variance. Injectors that are sold as "new" by other companies are not flow tested at all.

There are plenty of low cost "rebuilt" injectors on the market, but our injectors are guaranteed to be better than new. We would not 'waste our time' rebuilding injectors, if we did not believe (and prove!) that our injectors are the highest quality on the market.

If you have any questions regarding our injector warranty, our rebuilding procedures, or our commitment to excellence for our customers, please do not hesitate to contact Swamp's Diesel.
